

A Whole School Approach to Online Safety

At St Paul's we continue to create a culture that incorporates the principles of online safety across all aspects of school life.

At St Paul's, we proactively engage staff, pupils and parents/carers in activities that promote the principles of online safety.

At St Paul's we continually review and maintain the online safety principles to ensure they are relevant to the pupils of St Paul's.

At St Paul's we embed the online safety principles by:

- * using the principles throughout all curriculum subjects
- * reinforcing what is taught in online safety lessons throughout the school
- * taking appropriate and consistent action with regards to unacceptable online behaviours

At St Paul's we model the online safety principles consistently across the school.

At St Paul's we support parents/carers with online safety, so everyone is able to use the online safety principles.
